

Before you make a single call...

Save yourself some time, before you even pick up the phone or email a contract manufacturer make sure they DO NOT display (1) **any unauthorized trademarks from FDA or USDA** (2) **any made-up GMP icons** (3) **Don't even fall for someone that illegally and without permission displays the NSF icon.** Below I will show you how to make sure the use of the NSF icon is authorized. If it's not authorized the icon has NO MEANING AT ALL.

Don't Fall for Unauthorized and Deceitful Use of Federal Trademarks!

It's illegal to use the USDA logo and it's illegal to add the word "Approved" to that logo!!!!

It's illegal to use the FDA logo on your website!

WARNING: If a contract manufacturer displays either the FDA logo or the above USDA trademarked logos, they are doing so WITHOUT a permission and are breaking multiple regulations and laws, including trademark laws.

Those companies are misleading and knowingly deceitful. Such behaviors can trick naïve people to do business with such entities and in turn receive DANGEROUS products that may end up killing someone. This kind of behavior must be reported as a matter of safety violation.

It is clearly a matter of your civic duty to report such unauthorized use of FDA and USDA trademarks to the authorities without delay.

Report safety violations to FDA here:

<https://www.safetyreporting.hhs.gov/SRP2/en/Home.aspx?sid=9f17fa09-8a0a-4790-8fcc-abc255619600>

Report safety violations to USDA here:

<https://www.fsis.usda.gov/wps/portal/fsis/topics/recalls-and-public-health-alerts/report-a-problem-with-food>

Don't Fall for Made-up GMP Icons!

The above icons carry not guarantees of any compliance with GMP protocols!!!! You can have one of those designed for \$5 or pick them up for free on the internet and display them on your website. We found 100s of those icons on Google.

It is extremely dangerous to do business with anyone who uses one of those icons. Making supplements is a serious concern. You may not realize it at first and think that this industry isn't regulated. Indeed, it is heavily regulated, and for a reason. A good reason that is.

It's a fact that FDA most frequent Warning Letters, called "Form 483" are about failure to perform finished good testing. Why do you think they focus on that? Perhaps because its a fact that if oil soluble vitamins are not correctly manufactured that they can cause people to go on kidney dialysis for life and can kill people in the worst case.

Further it is a fact that the factory is the last line of defense against bacterial infections in supplements. Food is for the most part either washed or boiled, a process that gets rid of bacteria's, but with supplements it's a different story. When is the last time you rinsed off a capsule in the sink before you swallowed it? It is therefore very important that the facility follow basic GMP protocols when manufacturing and testing the quality of supplements.

Do not go with a manufacturer that displays any made-up logos concerning GMP Certifications. They are lying to you! Why do business with liars? Why pay them thousands of dollars? **Will they be in business when you think you can pick the product up?** We have heard multiple stories about people losing their deposits to companies that display such logos. Further, once they have your money their customer service skills go down the toilet.

Don't Fall for Contract Manufacturers that Display Unauthorized NSF Icons!

The only companies you should be calling are companies that can be verified to be certified GMP compliant. If you for example see an NSF certification for GMP then you to go this website:

<https://info.nsf.org/Certified/GMP/>

You type in the company name in the search field and then you should find the company easily, including the company logo. For PureNSM you would search using our full company name:

Nutritional Supplement Manufacturers

Then you should get this page for the company you searched for.

Don't Fall for Contract Manufacturers that Give You a PDF of their NSF Certification!

Do what Amazon does periodically with all their products they carry. They check out if the facility manufacturing the product is certified. Again for NSF certifications you go to this website: info.nsf.org/Certified/GMP (no www.) in order to verify. To check our company out, you enter our name: Nutritional Supplement Manufacturers

For UL certifications for GMP compliance you go to the UL website:

<https://crs.ul.com/en/ul-registrar-certified-client-listing/>

Then you click Ctrl+F and search for PureNSM or Nutritional Supplement Manufacturers.

When you apply to have your products carried on Amazon you point out that you have verified your contract manufacturer. This earns you extra credit with your (unknown) Amazon Mystery Rep!!!!

This will speed things up for you! But first...

But first you must have an invoice generated by us. You then give the invoice number to Amazon. Someone from Amazon then calls us and checks out our certifications periodically in addition to checking out if we are still manufacturing for you.

They do that by calling us (yes, we talk to Amazon many times!!!) and asking us for the lot numbers on your product.
